## **Surgical ophthalmic magnifier PENTAX PRISMVUE NF2 T Series S (2.5x) (New)**

New,

Japanese production,

The S-series magnifier is a high-end Bright model,

PRISMVUE magnifier - is a prismatic magnifier equipped with unique PENTAX deflection prisms which provide the surgeon with a bright, enlarged view of the surgical field, while maintaining a straight posture, preventing the need to tilt the neck and back forward

The vertical forward-facing posture during operation prevents the operating lights from interfering with the user's head and always provides a bright field of vision.

Advantages of the magnifying glass:

Unique optical design,

A clear and broad field of vision,

The field of vision is 20-30% larger than that achieved with conventional products,

Reduces eye fatigue and neck tension,

Easy switching between enlarged and real views,

Replaceable noses,

Technical data:

Magnification: 2.5 x (96g),

Lens configuration:

3 Lens,

3 Spectacle lenses,

Total 6,

Working distance (WD): on request (35 cm-70 cm),
