- Manufactured by PRC,
- Power supply: 230 V,
- Emergency power supply: via new 11.1 V 2000mAH battery,
- Frequency: 50/60 Hz,
- Power: 60VA,
- The LS-1100 analyzer uses an advanced time-resolved fluorescence immunoassay (TRFIA) method for the quantitative testing of COVID-19, in vitro biomarkers of diabetes, inflammation, cardiovascular disease, hormones, gastric disease, kidney disease, cancer, etc.
- The TRFIA method is a super-sensitive detection technique characterized by the specific fluorescence of rare earth ions. It is not only highly sensitive, but also overcomes the instability of the enzyme marker and is the best choice for immunological detection. High fluorescence intensity and long-life of the labelled environment on the test results,
- It has the ability to test COVID-19:
 - Covid-19 Antigen,
 - 2019-nCoV IgM/IgG,
 - SARS-CoV-2 Neutralising Antibodies,
