GE 259A KTG unit (Reconditioned)

- Used,
- Technical condition: very good,
- Visual condition: very good,
- Made in USA,
- Power supply: 230 V,
- Frequency: 50/60 Hz,
- GE Corometrics 250 series (GE 259A) is a full-featured maternal/fetal monitoring system. It provides comprehensive perinatal monitoring needed during labor. Parameters include the ability to monitor twins, fetal ECG, TOCO/IUP, maternal NIBP, maternal SpO2 and maternal ECG,
- All the best for the baby:
 - Fetal monitoring capabilities include a fetal ECG for displaying and printing continuous, direct measurements of fetal heart rate (FHR) with a curve,
 - Alarms provide both an audible and visual warning when the FHR is outside a user-defined range, in situations where the upper or lower HR threshold is exceeded,
 - An optional and unique feature, Spectra Alerts™, simultaneously analyzes spectral information of FHR and uterine activity (UA) waveforms and alerts physicians to deviations from normal,
- Mother under constant control:
 - Corometrics 250 series provides a choice of integrated maternal pulse oximetry (MSpO2) from companies: GE Ohmeda, Masimo or Nellcor, making it easy for the physician to monitor, document and view the curve,
 - Selectable from a 3-lead maternal ECG signal, with cardiac pulse detection and elimination, it generates the maternal heart rate, displays the QRS curve and a six-second printout segment on demand,
 - Patented DINAMAP SuperSTAT non-invasive blood pressure (NIBP) measurement technology,
- A unique feature introduced by GE, Smart BP delays blood pressure measurement during labor contractions to avoid distracting the patient and obtain more meaningful diagnostic data,
- Nautilus' nine-element waterproof crystalline ultrasound transducers cover a wider focusing region with more uniform coverage at greater depths than conventional seven-crystal transducers. The nine-crystal design allows for minimal transducer repositioning, even for challenging patients of varying body mass and gestational age,
- When monitoring twins, independent ultrasound intensity controls allow the transducer to be applied in such a way that both heart rates can be heard at the same time,
- ChartLight function with new backlit keys with dimmable display,
- Selectable menu in EN, ES, DE, FR, JP, IT, SW, NL,
- Keyboard on the control panel in English,
- Included:
 - User manual in English (PDF),
 - Fetal spiral electrode cable for coronometry (2.4 m),
 - GE Nautilus Toco head,
 - GE Nautilus US head,
 - NIBP cable + cuff,
 - ECG 3-lead cable,
 - ECG bus cable,
 - SPO₂ - brand new silicone sensor,
 - Power cord,
- Dimensions: 45 x 42.5 x 17 cm,
- Weight: 12 kg,
- Valid technical passport issued,
- Warranty:
 - 6 months for domestic market - Poland,
 - 3 months for the international market,
- Possibility of financing (Poland only): Installments, Leasing, Loan,
