## **TIC MEDIZINTECHNIK UROPORT NG Wireless system for uroflowmetry (New)**

- New,
- Made in Germany,
- UroPort NG was developed as a powerful uroflowmetry system specifically to meet the daily needs of medical centers and clinics,
- UroPort NG is a urological diagnostic device designed to evaluate urinary flow parameters according to ICS (International Continence Society Standardization Committees) standards to study bladder emptying disorders as well as various forms of incontinence,
- Product features and advantages:
  - Innovative, with voice messages for the user,
  - Future-proof with update function,
  - Measurement and analysis results can be conveniently and quickly recorded with the integrated high-speed thermal printer. An optional reader for electronic medical cards (G2) that reads patient data and puts it on paper along with the measurement results completes the UroPort system,
  - Quick setup and easy cleaning,
  - Scalable volume curve (25 ml/s or 50 ml/s)
  - Siroky and Liverpool nomograms (optional) with option to deactivate them,
  - Customized printouts (physician/medical center information/logo),
  - Has adjustable measurement modes (automatic/manual),
  - Can be wall-mounted (optional),
- The system is equipped with:
  - 4" high-speed thermal printer with Easy-Load function,
  - Touch LED panel,
  - High-precision weighing scale,
  - Various nomograms and analytical procedures based on ICS standards that make it easy for the physician to evaluate flow results,
  - A precise sensor system that can be placed virtually anywhere thanks to a separate stand,
- Indications for uroflowmetry:
  - Urethral stenosis,
  - Micturition disorders in children,
  - Symptoms of overactive bladder,
  - Bladder outlet obstruction (BOO, BPO, sphincter dyssynergia),
  - Planned TURP/adenomectomy/bladder neck incision,
  - Urinary incontinence after prostatectomy,
  - Determination of condition before urological/gynecological interventions,
  - Bladder emptying disorders after pelvic surgery,
  - Micturition with abdominal muscle compression,
  - Therapy monitoring for BPS pharmacotherapy,
  - Therapy monitoring after urethral reconstruction and internal urethrotomy,
- It has a current Technical Passport issued,
- Warranty 24 months,
