The Olympus GIF-Q165

is a video gastroscope that produces high-quality images.

The outer diameter of the endoscopic probe tip and the outer diameter of the endoscopic probe tube provide excellent insertion options.

The Scope ID function stores information in a built-in memory system and displays it on the monitor.

The wide field of view allows for precise observation of the selected area.

The 2.8 mm diameter endoscope channel allows for the use of a wide range of therapeutic accessories.

Convenient button access and user-programmable switches simplify operation.

The 4-way bendable endoscope tip allows for a complete and comprehensive examination of the upper gastrointestinal tract.
