Frequency: 50/60 Hz,
Bulb: 375 W,
Solmed UNO

is a lamp designed for performing skin tissue heating treatments using infrared thermal energy emitted by a single bulb. Additionally, depending on the desired treatment effect, a red or blue color filter can be used, which changes the radiation characteristics. It is equipped with a single tube. The lamp is used to treat certain chronic and subacute inflammatory conditions and pain syndromes.

Control panel:

Display -

located in the central part of the control panel. It displays the lamp's operating parameters.

Buttons for changing operating parameters (bulb power and operating time) - on the left side of the panel are buttons for setting the bulb power, and on the right side are buttons for setting the treatment time.

START and STOP buttons -

The START button is used to start and stop the treatment (PAUSE mode), and the STOP button is used to stop the treatment. The START button is also used to exit sleep mode.

PROGRAM button -

This button is used to enter treatment sequence programming mode. Programming mode is indicated by a LED located under the button.
