The IntelliVue MP30

is a patient monitor that monitors multiple vital signs.
A 10-inch TFT LCD panel display with SVGA resolution.

Operation via a touchscreen and a navigation joystick allows direct access to many functions using simple commands.
A comfortable handle and durable housing make it easy to carry.

Measurement trends can be presented graphically, combining up to three curves on a single graph, allowing for easy identification of changes in the patient's physiological condition.

Parameter trends Rapid-variable data can be updated per beat, and up to four high-resolution trend segments can be displayed.
IntelliVue Technology - access to information from various systems in the hospital network - pharmacy, laboratory, ECG management, radiology PACS, server-based hospital systems, and others - and deliver it to the patient monitor.

No separate hard drive or fan - IntelliVue monitors are small, quiet, stable, and start quickly.
The navigation knob makes it easy to enter information and navigate the screen.

Acoustic and visual alarms.

LAN.
