## **DORC EVA 8000COM.05 Phacoemulsification and Vitrectomy Device (Reconditioned)**

Reconditioned (used),  
Technical condition: very good,  
Visual condition: very good,  
Actual product photos,  
Made in the Netherlands (2019),  
Power supply: 230 V,  
Frequency: 50/60 Hz,  
Power: 650 VA,  
The DORC EVA device  
is an innovative system for vitrectomy and cataract surgery, providing the operator with full control over the procedure.  
The system eliminates the risk of unwanted pulsation and ensures precise flow or rapid negative pressure, as required by the surgeon.  
At the heart of the EVA system is a revolutionary fluid control system called VacuFlow VTi, using intelligent Valve Timing technology. Simply put, EVA VacuFlow VTi technology gives you full control at all times.  
Automatic infusion compensation ensures stable intraocular pressure during vitreoretinal procedures.  
Features:  
Vacuflow VTi technology,  
LED endoillumination module,  
Graphical user interface,  
Infusion system,  
Vitrectomy module,  
Phacoemulsification module,  
Fluid flow control,  
Two-dimensional cutting,  
Fluid-air exchange function,  
Diathermy function,  
Integrated foot control.  
Includes:  
Power cord,  
2 pcs. – New DORC phacoemulsification heads,  
2 pcs. – New DORC diathermy forceps,  
2 pcs. – New diathermy connection cables,  
Foot control.  
Updated inspection and ready for use.  
Technical Passport issued. (Service Report) valid for 12 months,  
Warranty:  
6 months for the domestic market (Poland),  
3 months for the international market,  
Warranty can be extended for an additional fee to 12 months for the domestic and international markets,
