SMART YESON welder (New)

New

Features and advantages of the welding machine:

A very elegant, energy-saving welding machine equipped with an electronically controlled heating element,

Made of very high quality plastic,

A practical table with a measuring tape facilitates work,

A modern device helpful in the preparation of paper and foil packages intended for sterilizing tools in an autoclave,

Conducting sterilization in packages is considered a particularly effective, safe and convenient method,

It allows you to store sterile tools for a long time after the process,

The welder can be used to close ready-made packages or sleeves in rolls of different widths,

Precise cutting off the necessary section of the sleeve allows a knife with a double-sided blade,

Automatic temperature adjustment of the heating element helps to obtain very good quality welds,

The device status is indicated by a diode,

Energy saving function - automatic transition to the waiting state during a work break,

Technical data:

Voltage 230 V / 50 Hz,

100W power,

Maximum length of the weld 300 mm,

The width of the weld 12 mm,

The weight of the device is 5 kg,

Has a current Technical Passport issued,

12 months warranty
