DRAGER FABIUS MRI anesthesia machine respirator - ventilator (Reconditioned)

Used, very good technical condition,

German production,

Easy to operate anaesthesia machine for magnetic resonance imaging laboratory,

Fresh gas supply with manual operation of rotameters,

Facilitated positioning of the breathing system on both sides,

Features two vaporizer ports with common Dräger PLUG-IN connector systems,

High resolution 6.5" colour LCD display,

Dräger's Fabius® MRI device is specifically designed for use in MRI environments and is certified for use in magnetic field strengths up to 40 mT or 400 Gauss. This ensures reliable operation with imaging devices with magnets of 1.5 and even 3.0 tesla,

The instrument is equipped with a reciprocating ventilator that does not consume drive gases. This design provides a wider flow range and more accurate tidal volume metering than traditional bellows ventilators,

Ventilation modes:

Volumetric mode,

Pressure mode,

Pressure assisted ventilation modes,

SIMV/PS ventilation mode,

Adjustable respiratory rate range: 4 - 60 breaths per minute,

Tidal volume adjustment range: 20 - 1400 ml,

Battery operation time 45 - 120 minutes,

Two Dräger Vapor 2000 vaporisers are included - for Isoflurane and Sevoflurane,

Dimensions: 78 x 140 x 92 cm,

Weight: 165.8 kg,

It has a valid Technical Passport,

On the domestic market (Poland), in case of installation of the device within 30 days from the date of delivery of the equipment, installation and training are free of charge, after exceeding this deadline these services will be charged.

Warranty:

6 months (for domestic market - Poland) is valid in case of activation of the device by our technician within 30 days from the date of delivery of the equipment,

1 month for the international market,

Financing option (Poland only): instalments, leasing, loan,

Sample pictures of the device!!!
